

DBMS Practical List - 3
Platform : Oracle Express
Implementation of DDL commands of SQL

1. Create a table "Employee" with following attributes :

<u>Field Name</u>	<u>Type</u>	<u>Size</u>
EmpCode	Number	
Name	varchar2	6
Salary	Number	

2. Display the structure of table
3. Increase the size of name column to 25.
4. See the structure of table again.
5. Drop the columns "name" and "empcode" from Emp table.
6. Change table name Emp to Emp1
7. Drop the "Emp1" table.
